I. MAIN TEXT

thus

We can show that the proposed LMF satisfies the zero to one boundary range:

$$e_x^{\text{exact}}(\mathbf{r}) \leq 0,$$

$$e_x^{\text{FA}}(\mathbf{r}) \leq 0,$$

$$e_x^{\text{exact}}(\mathbf{r}) \leq e_x^{\text{FA}}(\mathbf{r}),$$

$$0 \leq \frac{e_x^{\text{FA}}}{e_x^{\text{exact}}} \leq 1. \quad (1)$$
